BLANKET INSULATION

Removable Reusable Blanket Insulation

Energy savings | *Noise reduction* | *Safety solutions*

THERMAL  BLANKET

ACOUSTIC  BLANKET

SAFETY  BLANKET

 www.tasblanketinsulation.eu

Features and Benefits:

TAS solutions offer:

- Proven Solutions with a history of success since 1988
- Best Quality-Price ratio
- Removable and Reusable
- Thermal Blankets offer an attractive payback period of 4-16 months
- Acoustic Blankets offer a highly effective noise reduction of 4-15 dBA
- Rain Shield enclosures for washdown and weather protection
- Safety Spray Shield enclosures for process leak prevention
- Double Sewn and Binded Edges
- CAD designed for exact fit & finish, each piece is custom designed
- Multiple piece design for ease of installation
- User-friendly installation and removal within minutes
- Integral fasteners
- Thermal efficiency of up to 95%
- Expected Lifetime 15 years
- Warranty

Energy savings | Noise reduction | Safety solutions

THERMAL BLANKET INSULATION

- Steam Systems
- Chilled Water Applications
- Process Industry
- Gas Transmission
- Plastic Industry
- Food Processing/Sanitary
- Refinery/Chemical Industry
- Paper and Pump Mills
- Tire Manufacturing
- Laundry Services
- Marine Applications
- Engine Exhaust

ACOUSTIC BLANKET INSULATION

- Liquid Chillers
- Fans, Blowers
- Compressors
- Power Generation

SAFETY BLANKET INSULATION

- Process Industry – washdown conditions
- Fire Protection for sensitive equipment

Energy Surveys

- Energy surveys are typically free of charge, depending on project
- Will show the opportunity for energy savings and payback period
- TAS offers heat loss calculation to define a specified scope of work and measured performance on steam and process systems
- Actual savings are within a 5% error rate

See the ENERGY SURVEY SAMPLE on the last page.

Measurements on site

- Depending on the project, TAS staff may do a site visit to obtain necessary measurements for design, which is necessary to achieve a perfect fit of the blanket insulations
- Typically it is included in the pricing

Proven Solutions with a history of success since 1988

Installation

- TAS offers installation services for large or complicated projects
- Typically it will be included in the turn-key offering
- TAS staff is well trained, experienced and fully insured

M & V Reporting

- Measure and verification reporting using picture-on-picture thermography
- It is not a standard service, but can be added to the offering
- Define Savings within the 5% error rate
- Sound Testing report pre and post installation

THERMAL BLANKET INSULATION

Energy savings

TAS Thermal Blanket Solutions for Steam Systems

- Quick payback period. The investment pays for itself in 4-16 months.
- Instant energy savings, lower emissions, lower ambient temperature.
- Improve safety conditions by insulating hot surfaces.
- Steam valves, boiler doors, manways, flanges, expansion joints, flowmeters, piping and much more.
- Turnkey project done by TAS team.

BEFORE

AFTER

Thermal Blanket Solutions for Boiler Doors and Steam Traps

- Captures 75% of all radiant heat loss
- Cost-effective solution
- Ideal for eliminating safety concerns with hot surfaces
- Standard and custom offering
- Can be sold as standard insulation for all steam traps
- Custom design for boiler doors

Thermal Blanket Solutions for the Process Applications

TAS offers blanket insulation for process applications that require Non-Wicking & Non-Porous solutions.

- Industries: Pharmaceutical, Refineries, Chemical Processing, Distilleries, Industrial, Manufacturing
- Chemical and acidic resistant materials
- Non-Porous & Non-Wicking
- Are designed for outdoor conditions, weather resistant materials

Thermal Blanket Solutions for the **Plastics Industry**

- Significantly reduces heat loss and surface temperature for plastics extrusion, injection molding and blow molding equipment
- Average payback period is a few months!
- Protects workers from hot surfaces
- Reduces ambient temperature
- High Quality, long lifetime materials

Thermal Blanket Solutions for the **Food Processing/Sanitary**

TAS Blankets will boost steam system thermal efficiency, which improves steam quality and the overall manufacturing process.

- Approved materials (sanitary wash-down)
- PTFE jacketing fabrics
- Drastically lower ambient temperatures
- Instant energy savings
- Improved safety conditions

THERMAL BLANKET INSULATION

Thermal Blanket Solutions for Refinery Applications, Chemical Process

- Oil resistant jacketing & Non-Flammable
- Specifications up to 1000 °C
- Improves steam quality
- Improves steam tracing performance, complex surfaces otherwise left untreated

Thermal Blanket Solutions for Tire Manufacturing

TAS Blanket Insulations offer solutions for tire presses and steam systems.

- Saves energy, lower ambient temperature
- Improved cure times
- Covers complex surfaces
- Non-flammable
- Durable materials, double sewn and binded edges

Energy savings

TAS

ACOUSTIC BLANKET INSULATION

TAS Acoustic Blanket Solutions

TAS Acoustic Blanket Insulation offers a noise reduction solution on complex surfaces.

- Applications Include: compressors, pumps, fan housing, ducting, process piping, valves, motors.
- Treats the sound problem at the source with a direct surface treatment, wrapping critical complex components that would otherwise be left untreated.
- Offer Standard & Custom designed packages.
- Will generate up to 16 decibels of reduction, depending on the application, nature of the field condition and sound profile of the source noise.

Noise reduction

TAS

BLANKET DESIGN FEATURES

1. Silicone coated fiberglass cloth
2. PTFE coated fiberglass cloth
3. ATEX approved materials
4. PTFE fabric for food processing, chemical resistance and high humidity environment
5. Stainless steel wiretwist
6. Metal embossed ID tag for each piece

7. Velcro® and simple flaps
8. Stainless steel buckles with straps
9. Double sewn and binded edges
10. Metal gommet for leak detection
